

Jacob Ammons

Technology Leader & Full-Stack Systems Architect • Maritime
Captain & Engineer

🌐 ammons.dev ✉ jacob@ammons.dev ☎ (772) 913-2268 (Preferred)

Technology leader and full-stack systems architect with **13+ years** building custom business solutions and a record of turning complex operations into reliable, intuitive products. **Co-founded** and technically led a **multi-tenant SaaS company**, engineered **AI-assisted automation**, directed engineering teams, and delivered business-critical systems across **finance, healthcare, field service, and transportation**. Combines hands-on product engineering with infrastructure, networking, hardware, and maritime operational leadership.

SOFTWARE & SYSTEMS ENGINEERING

Architecture, AI automation, SaaS, infrastructure, networking, product leadership, and 3D design/fabrication

MARITIME OPERATIONS & ENGINEERING

Nearshore towing, vessel operations, navigation, sailing, and technical field experience

● PROFESSIONAL EXPERIENCE

● Co-Founder & Chief Technology Officer (CTO)

[Appliance Repair American / GuildUSA](#)

[guildusa.com](#) [appliancerepairamerican.com](#)

Co-founded GuildUSA and owned the **product architecture**, infrastructure, technical roadmap, and delivery of a **multi-tenant operations platform** for appliance-repair businesses.

- ▶ Architected the **SaaS platform from the ground up**, enabling independent businesses to operate securely from one codebase with tenant-specific data, media, documentation, and workflows.
- ▶ **Led four engineers** through production launch cycles while remaining the principal hands-on contributor for **architecture**, feature delivery, **live issue resolution**, and technical decision-making.
- ▶ Delivered an integrated **CRM** spanning scheduling, invoicing, **accounting**, technician **payroll and commission verification**, **inventory**, **parts tracking**, and **operational reporting**.
- ▶ Built **AI-powered voice and SMS** workflows for customer communication, appointment scheduling, and business automation, plus **AI-assisted diagnostic** and repair tools for technicians.
- ▶ Integrated **third-party APIs** for parts ordering and fulfillment and engineered **cloud-backed storage** for service records and technical media.

Lead Software Developer, Data Science

Standard Financial (formerly Filing Findings)

- ▶ **Promoted to Lead Developer** based on project impact; directed the engineering team while continuing hands-on development.
- ▶ Built **data-processing and caching systems** for terabytes of SEC filing data, making investment and hedge-fund information accessible through intuitive analytical software.
- ▶ Translated advanced **hedge-fund performance formulas**, including **calculus-based metrics**, into tested production calculators.
- ▶ Collaborated directly with members of the **SEC software team** and **Charles Hoffman**, creator of Extensible Business Reporting Language (XBRL), during platform development.

Contract Software Engineer

Diamond Medical Group

Selected directly by the Vice President to eliminate a physician-report intake bottleneck across the **largest California physician and insurance network** at the time.

- ▶ Developed an **ML-trained OCR pipeline** using handwritten scans and electronically completed physician reports to extract data from both.
- ▶ Created a **human-in-the-loop** review application for side-by-side source comparison, correction, approval, and structured database storage.
- ▶ Eliminated routine manual transcription and increased **document-processing throughput by more than 600%** while improving verification accuracy.

Mobile & Analytics Software Developer

United Air Power – United Kingdom

Co-developed **field reporting and operational analytics** software for industrial pneumatic-loss surveys.

- ▶ Built **mobile workflows** for technicians to capture factory equipment losses and repair requirements, with automated upload and **report generation**.
- ▶ Converted field measurements into customer-facing comparisons of projected **energy savings** against repair costs.
- ▶ Delivered **management dashboards** for survey performance, workforce activity, technician hours, payroll, taxes, and administrative reporting.

Custom Business Software Developer

Sutton Rental Cars – Aventura, Florida

Built custom **fleet-management and marketplace automation** for a half-million-dollar rental operation listed across Turo, Getaround, and other peer-to-peer platforms.

- ▶ Used **web scraping, browser automation**, and **ML-assisted computer-use** workflows where APIs weren't available.
- ▶ Synchronized bookings across platforms and **automatically delisted vehicles** elsewhere when reserved, preventing conflicting rentals.
- ▶ Engineered **high-volume request processing** with state persistence, data validation, automatic retries, restart recovery, edge-case handling, and intelligent escalation alerts.
- ▶ Delivered a clear operating interface designed for reliable use by **non-technical staff**.

● CORE TECHNICAL EXPERTISE

● SOFTWARE, LANGUAGES, AND ARCHITECTURE

AI, Android, Assembly, Astro, AWS, Bash, Cloudflare, cPanel, C++, CSS3, Digital Ocean, DNS, Docker, ElevenLabs, Fastify, Git, HTML5, Java, JavaScript, Kotlin, Laravel, Linux, Lua, MongoDB, Next.js, Nginx, Node.js, OpenAI, PHP, Python, QBO, R2, R2, React, Redis, REST, Shell, Slack, SquareSpace, SQL/MySQL, Stripe, Swift, Twilio, Vue.js, VPS, WebRTC, WebSocket, WooCommerce, WordPress, XBRL

● AI & AUTOMATION

ML-trained OCR, AI voice and SMS workflows, browser automation, web scraping, computer-use agents, human-in-the-loop review

● SELECTED ADDITIONAL EXPERIENCE

Game Developer

[Aimtastic](#) · 4-Person Team

Contributed across **front-end and back-end development** for a monetized online game that reached approximately **20,000 unique players**.

Technical Instructor

[Private Instruction](#)

Delivered **110+ hours** of paid one-on-one front-end and back-end instruction to beginner and intermediate developers, including returning students.

Independent Client Solutions

[Web, E-Commerce, SEO & Automation](#)

Built client websites and lightweight business automations, including **Google Apps Script**, Calendar booking, Sheets synchronization, **APIs**, and **webhook-driven updates**. Clients reported meaningful increases in inquiries and work volume.

● MARITIME LEADERSHIP & ENGINEERING

Advanced from deckhand to vessel engineer and captain through disciplined self-directed learning, sound judgment, and dependable execution—taking on progressively greater responsibility for crews, vessel readiness, voyage planning, and operational safety.

- Accumulated **600+ loggable days at sea**, primarily in nearshore tug operations under tow, pushing barges, and running light boat.
- As **captain**, directed crews, planned vessel movements, delegated work, and made **time-sensitive decisions** to protect personnel, equipment, schedules, and mission objectives.
- As **engineer**, diagnosed mechanical and operational failures and executed practical repairs, restart procedures, and recovery plans under working conditions.
- Completed multiple Intracoastal Waterway transits between Boston and Key West, developing strong knowledge of navigational constraints, bridge clearances, weather, and tidal considerations.
- Supported repeated South Florida fireworks barge deliveries and communicated in English and Spanish with captains, crews, and port authorities during Central and South American operations.
- Completed **3,000+ hours of sailing** and instruction, earned numerous dinghy-regatta podiums, and **won the USSCMC Fall 2017 East Coast Series**.

Vessel Experience: 26–64 ft push-knee and model-bow tugs including *Eudora Lee*, *Miss Jennifer*, *Champion*, *Michael T*, *Dawn Star*, and *Lil Rita*; 90 ft passenger vessels *Capt Red* and *New Boston*; 108 ft Graham vessel *GIS Patriot*; 100 ft OSV *Sampson*, used in *James Bond* and *Pirates of the Caribbean* productions; 40–60 ft sportfishing vessels; and a 53 ft Xquisite sailing yacht.

● EDUCATION & DISTINCTIONS

◆ International Baccalaureate Diploma

Completed the internationally recognized IB Diploma Programme; the only student in Indian River County to pass the IB Chemistry examination in 2020.

◆ Florida State Deadlift Record

Current Florida state record holder in the applicable weight class, reflecting sustained discipline and performance under pressure.

◆ 3D Design & Additive Manufacturing

Owens and operates 3D printing equipment; designs and manufactures custom fix-it and replacement parts for equipment, extending hands-on hardware problem-solving into practical additive fabrication.

◆ FPV Aircraft Systems

Builds, configures, operates, and troubleshoots FPV quadcopters and their electronic, radio, and control systems.

◆ Advanced Watermanship

Thousands of hours fishing and freediving; capable of a 130 ft freedive and five-minute static breath hold.

◆ Lockpicking

Knowledgeable in mechanical lock operation and non-destructive entry techniques for common rudimentary lock systems.
